Key Achievements

- Completed the first pan-Canadian Projectathon to test Patient Summary Interoperability Specifications (PS-CA & CA:FeX).
- The Projectathon allowed for the generation of PS-CA FHIR-based documents and confirmed the validity of recommended exchange patterns.
- Participating vendors performed 67 tests in total, which is considered exceptional in the IHE community for a first Projectathon!
- 35 vendor representatives participated in the testing event!
- Significant participation & collaboration in the day 3 sessions, from:
 - 19 vendor participants from Allscripts, Cerner, Epic, JuniperCDS, SmileCDR and Orion
 - 18 jurisdictional participants from British Columbia, Alberta, Saskatchewan, Ontario, and Newfoundland
 - 3 representatives from pan-Canadian Health Care Organizations (i.e., CIHI)
 - 3 representatives from IHE Canada, IHE International and IHE Europe
 - 1 representative from Ontario MD
- Captured many lessons learned which will be documented in our final Projectathon Report to be distributed in April.
