Projectathon Profile Overview

Canadian FHIR Exchange (CA:FeX)

Tib Onu

Senior Solutions Architect

What is Canadian FHIR Exchange (CA:FeX)?

- ❖ The Canadian FHIR Exchange (CA:FeX) is an implementable, testable interoperability specification based on HL7 FHIR Implementation Guides, that defines building blocks to enable creating, consuming and sharing clinical data via FHIR RESTful exchange patterns.
- ❖ The following are some examples of the benefits of CA:FeX:
 - ❖ Supports scenarios of health care provider creating, viewing and updating documents using standardized HL7 FHIR operations such as submission, search and retrieval
 - ❖ Supports safe provision of care in a scheduled or unscheduled medical situation
 - ❖ Supports transitions of care or transfers of patients across the continuum of care
 - ❖ Supports coordination and collaboration of a patient's care
- ❖ For the purpose of the upcoming Projectathon, data exchanged using CA:FeX transactions will consist of FHIR Patient Summary documents

Profile Actors and Transactions
