

Pan-Canadian Projectathon, March 2023

Day 1 Summary

Day 1 Projectathon Dashboard No Peer Test Execution Summary

**Source: Gazelle KPI For Systems as of 3:30 PM EST 3/20/2023*

	Test Instance Execution Summary
CA:FeX	13 Test Instances Successfully Completed 7 Test Instances In-Progress 25 Test Instances Waiting to be Graded
MHD	2 Test Instances Successfully Completed 3 Test Instances In-Progress 8 Test Instances Waiting to be Graded
IUA	11 Test Instances Successfully Completed 0 Test Instances In-Progress 7 Test Instances Waiting to be Graded
CA:Sec	6 Test Instances Successfully Completed 1 Test Instances In-Progress 2 Test Instances Waiting to be Graded
CA:Aud	0 Test Instances Successfully Completed 0 Test Instances In-Progress 4 Test Instances Waiting to be Graded
CT	6 Test Instances Successfully Completed 0 Test Instances In-Progress 0 Test Instances Waiting to be Graded
PS-CA / PS-ON	1 Test Instances Successfully Completed 2 Test Instances In-Progress 2 Test Instances Waiting to be Graded

**Note: CA:FeX Data Source Actor was only tested*

Key Achievements

- 9 vendors participated in Day 1 of the Projectathon, with 2 returning vendors and 7 brand new vendors
- Overall, 96 tests were conducted, where 36 no-peer tests were successfully completed, 11 tests are in progress, 1 test is partially verified and 48 tests are waiting to be verified by monitors
- Vendor familiarity with the Projectathon tool (i.e., Gazelle) and the communication channel (i.e., RocketChat) helped streamline the event
- IHE Catalyst and Infoway Support Team resolved vendor onboarding issues for speedy troubleshooting

Challenges & Mitigations

- **Evidence for Tests:** A few vendors experienced issues in providing evidence for completed tests on Gazelle, which was quickly resolved through tech support with the monitor team
- **Security:** Some vendors experienced issues with security certificates (e.g. TLS)
- **Proxy:** Some vendors experienced issues with errors from their system when trying to connect to the Proxy

Day 1 FAQs

- **Can vendors still pass CA:FeX even if they do not pass CA:Aud?** Yes, because those two tests are not tightly coupled to allow for testing flexibility. However, the individual vendor results report will not show successful pass for audit requirements.
- **Do vendors have to test for both PS-CA and PS-ON?** Although we are offering the opportunity to test products against both national and Ontario-specific specifications, vendors are not obligated to complete tests for both PS-CA and PS-ON. The individual vendor report will simply state which tests were successfully completed (e.g. PS-CA / PS-ON).

What to Expect for Day 2

- Peer-to-Peer Tests
- VIP Business / Technical Tours (for non-participants of the Projectathon Testing)
