

PrescribelT

Welcome to PrescribelT®

Canada Health Infoway is working with Health Canada, the provinces and territories, and industry stakeholders to create, operate and maintain a financially self-sustaining, multi-jurisdiction e-prescribing service, known as PrescribelT®. This will be a single service that can be scaled for use across the country enabling prescribers to electronically transmit a prescription to a patient's pharmacy of choice.

The pan-Canadian PrescribelT® subsets provide a standardized way for systems to capture, store, retrieve and transmit related health information.

As of June 18, 2021, **three versions of PrescribelT®** are available on the Terminology Gateway.

- Version 2.0.x, where x will increase each month with a new release of PrescriptionMedicinalProduct
- Version 3.0.x, where x will increase each month with a new release of PrescriptionMedicinalProduct
- Version 5.0.x, where x will increase each month with a new release of PrescriptionMedicinalProduct

More information about each of these releases can be found on the appropriate page from the left side menu.

General information about PrescribelT® is on the [About PrescribelT®](#) page.

PrescribelT® [current release](#) Version 2.0.x or Version 3.0.x or Version 5.0.x.
