Subset	Versions Impacted	Changes
SharedPatientJurisdictionalHealthIdentifierType Current Version: 20211125 New Version: 20220615	5.0.9 3.0.18 2.0.35	One concept updated with new concept name and new French display name. Once concept updated with new French display name.
PrescriptionType Current Version: 20190415 New Version: 20220615	5.0.9	One concept updated with new French display name
DetectedIssueCategory Current Version: 20190415 New Version: 20220615	5.0.9	One concept updated with new French display name.
PrescribedQuantityUnit Current version: 20210308 New version: 20220331	5.0.9	Code system URI updated. Code system version updated. 2 concepts updated with new French display names.
PrescriptionAdministrationSite Current version: 20190430 New version: 20220331	5.0.9	Code system URI updated. Code system version updated. Two concepts added Two concepts inactivated One concept updated
PrescriptionDoseQuantityUnit Current version: 20210308 New version: 20220331	5.0.9	Code system URI updated. Code system version updated. 2 concepts updated with new French display names
PrescriptionDrugForm Current version: 20190430 New Version: 20200331	5.0.9	Code system version updated. 3 concept names updated.
PrescriptionIndicationForUse Current version: 20190430 New version: 20220331	5.0.9	One code system removed. Code system URI updated. Code system version updated. 2 concepts inactivated. 2 new concepts added. 24 concepts updated with new French display names.
SharedMessageEvents Current Version: 20190415 New Version: 20220810	5.0.9	Removing 4 concepts. Updating 2 concepts. Adding 1 concept.

SharedIssueDetails Current Version: 20211004 New Version: 20220809	5.0.9	Removing 16 concepts. Updating 12 concepts. Adding 11 concepts.
Discontinue Reason New Date: 20220726	5.0.9	New subset with 7 new concepts.
PrescriptionTaskType Current Version: 20190315 New Date: 20220913	5.0.9	Added one concept

Also changed in this release:

- There was an issue identified where many SNOMED concept values were showing a code system URI of <https://fhir.infoway-inforoute.ca/CodeSystem/snomedctaextension> instead of <http://snomed.info/sct>.
- This issue has been corrected in 5.0.9, 3.0.18, and 2.0.35.
- Since the impacted subsets are extensible, there is no need to update existing system implementations as the codes will not be rejected with either URI.
