## How to Provide Feedback

The Public Review period for the **pan-Canadian FHIR Exchange Interoperability Specifications v1.0.0 TI Candidate** is now open!

The timeline for Public Review is: September 9 - 21, 2022.

You may review the CA:FeX Specifications in the following formats:

- Download the CA:FeX specifications in PDF format from the corresponding links on the [Release page](#).
- Review the CA:FeX Specifications in InfoScribe, from the corresponding link on the [Release page](#).

How to submit your feedback:

- All Collaborators are invited to document comments using the **Public Review Comments CA:FeX v1.0.0 TI Candidate** spreadsheet, available [here](#).
- Send an email to [standards@infoway-inforoute.ca](mailto:standards@infoway-inforoute.ca), with Subject Line "CA:FeX", including the Comments spreadsheet as an attachment.
- We kindly ask that each organization submit all comments within one spreadsheet submission.
- Upon submission, you will receive an acknowledgement email with a reference number. Our team will complete a review of all comments, determine the appropriate disposition for each item and incorporate changes and backlog items for a future release.

For questions, please contact us at [standards@infoway-inforoute.ca](mailto:standards@infoway-inforoute.ca)

## Release Notes

- Updated an error in the Search Data [CA:FeX-2] to state that the Data Responder (not the Data Recipient) receives the request and returns the Bundle.
- Updated the CA:FeX Search content to better reflect the historical context behind proliferation of XDS.
- Defined new guidance in the CA:FeX Interoperability Specifications on how to use CA:FeX in conjunction with ATNA (CA:Sec and CA:Aud), CT and IUA to support the secure exchange of the PS-CA (new pages for Cross Profile Considerations and Audit Considerations).
- Removed the Reference Architecture section.
  - Content core to the Reference Architecture, an evolving blueprint of service availability that supports a broader interoperability landscape, not limited to PS-CA or CA:FeX, has been moved to the Reference Architecture (RA), [RA v0.1.0 DFT](#).
  - RA content focused specifically on the CA:FeX has been moved to the CA:FeX Interoperability Specifications (e.g., CA:FeX Sequence Diagrams).
  - Updates applied throughout the CA:FeX Specifications to point to the new RA where content previously existed in the Reference Architecture section of the CA:FeX.
