

3. French information – Information en français

The below sections are currently under review due to the Immunization Redesign

If you have questions or need information, please [contact us](#)

French information – Information en français

The current release includes French Preferred Synonyms (PS) for all of the immunization subsets.

These preferred synonyms already existed from the 2009 Translation Project of SNOMED CT in Canadian French or were provided to Infoway by the Public Health Agency of Canada (PHAC) through the Infoway request management system (InfoRMS) in summer of 2015.

Each immunization subset section in this guide (i.e. AntigenCode) includes a French subsection called: Preferred Synonym (French). That section is written in French and provides information to French speaking Canadian stakeholders.
