

20211209

Release Notes: Version 20211209

About this release

This release (version 20211209) provides the latest updates to the Canadian Clinical Drug Data Set in English and French. A separate InfoScribe location for the French supporting documents, including the French Release Notes, can be found [here](#).

There is no change to the Technical Specification or the Editorial Guidelines.

The Canadian Clinical Drug Data Set is available for browsing and download via the [Infoway Terminology Gateway](#).

Supporting general information can be found on Infoway [Canadian Clinical Drug Data Set InfoCentral page](#).

General Notes

The following files are available as full release files within this version:

- Manufactured Product,
- Non-proprietary Therapeutic Product,
- Therapeutic Moiety,
- Manufactured Product-Non-proprietary Therapeutic Product-Therapeutic Product Relationship, in English (MP-NTP-TM Relationship),
- Manufactured Product-Non-proprietary Therapeutic Product-Therapeutic Product Relationship, in French (Relation PM-PTC-FT),
- Special Groupings,
- Coded Attribute, and
- Device Non-proprietary Therapeutic Product.

The "Full" release contains one entry for every concept that has ever been released and new content added for that release. New content added for a specific release may at times include "Inactive" content.

NOTE: The "Delta" release which is intended to contain only those concepts that have been added or changed since the previous release will be considered for a future enhancement at a later date.

This release reflects additions and changes that have occurred in DPD since the last CCDD release.

Manufactured Product (MP)

There is 1 new deprecated concept in this version which was originally created in error.
